📍 Pasadena, CA 📞 (781)-985-0881

I am a computer scientist and mathematician interested in hidden variables in causal structures: when and if they can be learned and how they affect networks of opinions. I am currently pursuing a Ph.D. in Computing and Mathematical Sciences at Caltech supported by a NSF Graduate Research Fellowship.

EDUCATION

Williams College - Williamstown, MA

Sep 2012 - Jun 2016

Bachelor of Arts

Majors: Physics and Computer Science, GPA: 3.92

Honors: Highest Honors (Physics), Phi Beta Kappa, Sigma Xi, Magna Cum Laude

Cambridge University (Emmanuel College) - Cambridge, UK

Oct 2016 - Jun 2017

Mathematics Part 1B

Supported by a Herchel Smith Fellowship

Additional classes in Computer Science and Mathematics Part II

California Institute of Technology - Pasadena, CA

Oct 2017 - present

Ph.D. Candidate

NSF Graduate Research Fellowship

RESEARCH TOPICS

Data Fusion: We have developed “Expert Graphs” to study consistencies and inconsistencies in partial, but overlapping expertise. As it turns out, this problem is deeply related to issues in voting theory, such as the Cordocet Paradox.

Mixture Models for Causality: Interventional distributions acted on by a universal unobserved confounder can be thought of as a mixture model. Cardinality assumptions allow identification of within-component probability distributions, allowing access to interventional distributions that were previously considered unidentifiable.

Domain Adaptation and Transportability: I am interested in using causal principles to guide models that are robust to distribution shift in datasets.

WORK EXPERIENCE

Amazon Research Causality Lab - Tübingen, Germany

Oct 2022 - Feb 2023

Applied Scientist Intern (L6)

Worked with Mila Hardt, Atalanti Mastakouri, and Dominik Janzing

Paper submitted to UAI 2023

IBM T.J. Watson Research Center - Yorktown Heights, NY

Jun 2016 - Sep 2016

Intern

Worked with Dr. Victor Kravets (mentor) and Dr. Andrew Sullivan (manager).
Projects included non-greedy and map-reduce algorithms for factoring sum of products

BioDiscovery - El Segundo, CA

Jun 2017 - Sep 2017

Intern

Unsupervised machine learning on cancer genomes. Developed and implemented methods that lead to a conference poster.

TEACHING EXPERIENCE

Markov Chain Monte Carlo

Spring 2022

Head TA for Leonard Schulman's new class.

PUBLICATIONS

S. Gordon, ***B. Mazaheri**, Y. Rabani, L. Schulman. "*Identifying Discrete Mixtures of Bayesian Networks.*"

Accepted to CLEAR 2023.

S. Jain, **B. Mazaheri**, N. Raviv, J. Bruck. "*Glioblastoma signature in the DNA of blood-derived cells*" PLoS ONE 16(9): e0256831. 2021.

PATENTS

S. Jain, **B. Mazaheri**, N. Raviv, J. Bruck. "*Mutation profile and related labeled genomic components, methods and systems.*" 2019.

PROJECTS

LACCTiC.com

Sep 2021 - present

Website for ranking collegiate cross country with 10,000 regular users.

Algorithms/machine learning for adjusting times in different conditions.

Backend using Django, frontend using React, database hosted on AWS.

AWARDS

National Science Foundation Graduate Research Fellowship

Awarded Spring 2019

Awarded in 2019 for a proposal to research confounding influence in causal networks.

Amazon AI4Science Grant

Awarded Spring 2021

Funding for research with the potential to aid scientific discovery.

MENTORSHIP

Caltech Cross Country Team

Sep 2018 - present

Assistant Coach

Mentoring and supporting undergraduate students at Caltech.
